# ❖ INTRODUCTION TO BITCOIN

## *What is Bitcoin?*

Each Bitcoin is basically a computer file which is stored in a 'digital wallet' app on a smart phone or computer. People can send Bitcoins (or part of one) to your digital wallet, and you can send Bitcoins to other people. Every single transaction is recorded in a public list called the blockchain.

## ➤ *Cryptocurrency:*

A digital or virtual currency that uses cryptography for security.

- No physical appearance needed and is generally known as "cryptocoins"
- There exists many cryptocurrencies such as Bitcoin, Litecoin, Ethereum,
- Monero etc

# ❖ THE BASIC MECHANISM

- Transactions are published to the Bitcoin P2P Network
- Miners (Computers) compete to solve a proof-of-work problem on average every 10 minutes
- The winning miner publishes a summary of recent transactions in a block
- Miners are rewarded with new coins for having published a valid block
- Blocks are linked to previous blocks, creating a blockchain
- The Value of every account is evidently on the blockchain
- Everyone is expected to know the whole blockchain

# ❖ **BITCOIN MINING SERVICE AGREEMENT**

**GLOBAL CYBER MINING** can guide you on the right steps to take as enter the Bitcoin market place.

Entering into a Mining Service Agreement with **GLOBAL CYBER MINING** includes:

- All programming, maintenance and electricity is completed and paid for by GCM.
- All of the bitcoin mined by your leased machine are directly deposited into your personal coin café account for the entire term of the lease.

# ❖ MISSION AND VISION

## ➤ *MISSION :*

- To add more miners to the mining pool, which will help increase the security on the blockchain network.
- To achieve a stress-free cashless society through the Global acceptability and use of Bitcoin.
- To create wealth and financial stability with easy-to-get gadgets and devices.

## ➤ *VISION :*

- Observing the continuous growth in value of Bitcoins and considering it's future scope.
- Desire to earn great profit.

# ❖ **SYSTEM REQUIREMENT**

## ➤ *OPERATING SYSTEM :*

- A Smartphone with internet connection.
- A laptop or PC with internet connection.
- A cloud Mining account .
- Cloud Mining equipments and Hashpower (provided by GCM)

# ❖ **BITCOIN CLOUD MINING PROPOSAL**

**BITCOIN CLOUD MINING** is a process of extracting bitcoin, which is remotely controlled and usually provided by cloud providers. This cloud mining (extraction) method allows miners (those who participate in the extraction) to be able to extract bitcoin without having to manage and maintain the hardware required for the process.

**GLOBAL CYBER MINING INC.** provides these cloud mining services to investors and Bitcoin enthusiasts to mine and make profits without having to start up their own Mining rig. This is usually accompanied by a fee, charged by GCM . The fee depends on the type of services rendered.

## ❖ CONCLUSION AND FUTURE SCOPE

In conclusion, our long-term goal for the future entails the following;

- **MINING RIG** – The amount of coins an individual can mine depends on the power of the mining rig.
- **Converting a mining rig into a large mining farm in future will lead to a great profit for a miner.**

**We wish you a great Bitcoin mining experience and a warm welcome to the GLOBAL CYBER MINING family as you start mining with us soon!**
